### PROFESSIONAL SUMMARY

Software Engineer with a strong foundation in full-stack application development, backend engineering, and IT support, committed to building secure, scalable, and user-centered software solutions. Experienced in designing and developing web and mobile applications, RESTful APIs, and database-driven systems using modern technologies and industry best practices. Passionate about solving real-world problems through innovative technology within cross-functional teams, and continuously expanding technical expertise to deliver high-quality, impactful software

### WORK EXPERIENCE

#### ICT Industrial Attachment

##### *National Industrial Training Authority (NITA)*

#### ICT Industrial Attaché | National Industrial Training Authority (NITA)

- Collaborated with internal teams to provide first-line ICT technical support, maintaining 99% system uptime for organizational software and hardware.
- Assisted in user account setups, authorization mapping, email configurations, and secure system access management.
- Supported basic network infrastructure troubleshooting, including LAN connectivity, switch configurations, and router support.
- Participated in software deployment and routine server/system maintenance to ensure backend operational efficiency.

### PROJECTS

#### Secure Biometric Delivery System

- Designed and architected an enterprise-grade system backend aimed at preventing delivery fraud and impersonation.
- Implemented secure API endpoints and integrated biometric validation workflows to ensure data integrity and user authentication.
- Managed database schemas using PostgreSQL to handle real-time verification logs and user data securely.

#### Smart Season Project

- Developed a scalable seasonal management platform featuring responsive user interfaces and robust backend services.
- Designed and built clean, maintainable RESTful APIs to handle real-time data ingestion and efficient query processing.

#### Shelfie Reading Application

- Created a personalized book-tracking application featuring progress metrics and algorithmic recommendations.
- Developed backend services using Java and integrated third-party APIs for extended literary data retrieval.

### EDUCATION BACKGROUND

- **Bachelor of Science in Software Engineering** | University of Eastern Africa, Baraton (2022 to 2026).
- **Kenya Certificate of Secondary Education (KCSE)** | Friends School Kamusinga (2018 – 2022)

### TECHNICAL SKILLS

- **Backend & APIs:** Java (Spring Boot), JavaScript/TypeScript (Node.js, Express.js)
- **Database Management:** PostgreSQL, MySQL, MongoDB
- **Frontend Technologies:** React.js, Tailwind CSS
- **DevOps & Tools:** Git, GitHub, Docker (Basic), CI/CD concepts
- **Networking & Security:** LAN/WAN troubleshooting, API Security (JWT, OAuth concepts), Input Validation
- **IT Support:** Hardware/Software configuration, System Deployment, Infrastructure Maintenance

### CERTIFICATIONS & TRAINING

- Cisco Training Program (In Progress)
- Coursera Certifications (IT & Software-related courses)
- Microsoft Office Suite proficiency
